Passion for ELTHAM College

I have had an amazing journey at ELTHAM since 1999 with my two children and witnessed firsthand how the school, staff and program prepare our young people to pursue their passion and fulfil their maximum potential in this ever changing world. I coach and mentor many young graduates and my personal passion is to develop our young people to excel in the 'Connected World'. I want to continue to drive ELTHAM's philosophy in a world full of ideas and innovation so we enable our young people to break stereotypes and invent an equal, brighter future for us all.

Professional Background
